Title of Class *

Art Clay Basic Techniques

Class Description *

Learn to make unique jewelry using Art Clay. You will learn techniques for molding & sculpting the clay, and two techniques of firing the clay using both a blow torch and kiln.

Additional Class Description for the Web

Art Clay Silver is a pliable, aqueous clay that is transformed to pure silver by heating inside a kiln or with a simple propane torch. Now anyone can easily create one of a kind silver jewelry! Art Clay Silver is a pure metal powder mixed with non-toxic binders and water. When kiln, torch or stove fired, the binders burn away, leaving pure, 99.9% silver. Art Clay Silver can be added to a variety of media: glass, ceramics, porcelain and polymer clay to name a few. It can be rolled, sculpted, stamped, sanded, filed, engraved, drilled and pre-polished, all prior to firing. Once fired it's pure silver and can treated like any other pure silver. Limited only by your imagination, students can create beautiful, unique jewelry & keepsakes of all kinds.

Student Age Limits

16 to Adult

Required Class Size

Minimum

4

Maximum

9

Class Fee *

$75

Supply Portion of Fee

$15

Equipment Requirements

2 Power Strips

Room Set-up Instructions

4 6' tables 12 chairs
3 tables in a U shape facing the instructor's table. 3 chairs at each table arranged around the outside of the U. Power Strips at the front table & at the center table of the U shape.

Comments

Class Fee includes all supplies & equipment required for class.
